

30 June, 2016

To whom it may concern,

As the global manager of the VMware IT Academy, I confirm that Proyecto Universidad Empresa - PUE is currently enrolled in the VMware IT Academy program functioning as the Regional IT Academy for Spain.

As a VMware Regional IT Academy PUE fulfills the important role of providing program support and instructor training to other IT Academies in the region.

Each year PUE delivers multiple instructor training classes on the "VMware vSphere: Install, Configure, Manage" course to teach both the technology and how to effectively deliver the curriculum to students.

PUE is one of the top Regional IT Academies in Europe and consistently provides a high level of support and training to their customers. They are a valuable asset to both VMware and Spain.

Sincerely,

Dan Myers
Global Manager, VMware IT Academy
